

QBOT® Compatibilities

www.myQBOT.com

For QBOT to properly perform, a stitch-regulated sewing machine and a free-standing quilt frame are needed. Stitch regulation can be built-in (available for many long-arm machines) or added separately (mid-arm sewing machines must have a Quilter's Cruise Control®). We are always updating QBOT's compatibilities, please contact us to inquire. Please note: the development and test cycle for certain frames can be lengthy, so we ask for your patience as we expand QBOT's compatibilities.
